These sites are located at the intersection of HWY 52 and County Line Rd. Access to the research plots is on County Line Rd about 100 yards south of the intersection. There is a gate that you should use to enter the field. There will be tour signs posted. Plots are located along the fence line parallel to HWY 52 on the north side of the oil well. Signs will be positioned at the study site with treatment information.

Alligare Bare Ground Study: The treatments were applied at two different timings (Fall and Spring). The treatment signs are positioned between the fall and spring timing. The fall timing is on the south side of the treatment sign and the spring timing is on the north side of the sign. Fall timing-orange wooden frames at the beginning of the plots; spring timing-flag wires at the beginning of the plots.

DuraCor Common Mullein Study

Corteva has released its first new active ingredient in 15 years, Rinskor. DuraCor is a combination of aminopyralid (Milestone) and Rinskor. The combination of these two herbicides is now being marketed as DuraCor. This research site examines DuraCor's control on common mullein.
